E-Learning Platform Sales & Analytics Report

Executive Summary & MySQL Data Analysis Deliverable (Module-End 3)

Database Engine: MySQL 8.0 **Dataset Scope:** 5 Learners | 5 Courses | 7 Transactions **Currency Unit:** Indian Rupee (₹)

TOTAL REVENUE	TOTAL UNITS SOLD	TOP CATEGORY	ACTIVE LEARNERS
₹1,105.95	10 Units	Data Analytics	4 / 5 (80%)

1. EXECUTIVE PERFORMANCE SUMMARY

An evaluation of the e-learning platform's purchase database reveals strong revenue concentration in technical domains. Revenue is primarily driven by **Data Analytics** and **Database Management** courses, while standard introductory programming topics experience lower velocity or zero engagement.

Course Category	Unique Buyers	Total Revenue (₹)	Revenue Share	Performance Status
Data Analytics	3	₹539.95	48.8%	Top Performer
Database	2	₹299.00	27.0%	High Margin
Programming	1	₹267.00	24.2%	Single Course Driven

2. KEY INSIGHTS FROM SQL QUERIES (Q1–Q5)

- **Highest Spender (Q1):** RAMU leads overall spending at **₹569.46** across 3 separate course purchases, demonstrating strong customer lifetime value (LTV).
- **Top Performing Courses (Q2):** *Data Science Fundamentals* (3 units sold) and *Advanced MySQL Mastery* (2 units sold) are the platform's primary volume drivers.
- **Category Revenue Drivers (Q3):** *Data Analytics* generated the highest revenue (₹539.95) and reached the highest number of unique learners (3 unique buyers).
- **Cross-Category Upsell Success (Q4): 50% of active buyers** (RAMU & VEDA) purchased across multiple distinct categories, confirming cross-selling interest.
- **Catalog Redundancy (Q5):** *Advance Excel* (₹49.99) recorded **0 sales**, occupying catalog real estate without generating platform value.

3. STRATEGIC RECOMMENDATIONS

Actionable Business Next Steps:

- **Focus Marketing Capital:** Direct 60%+ of digital ad budget toward *Data Analytics* and *Database* categories, which account for over 75% of total revenue.
- **Promote Multi-Category Bundles:** Create discounted "Data Stack" bundles (e.g., MySQL + Power BI) to incentivize single-category buyers to cross-purchase.
- **Prune Inactive Catalog Content:** Retire unpurchased catalog items like *Advance Excel* and replace them with trending topics (e.g., Python for Data Analysis).
